...

I got laid off.

I had a great job but could not escape the market reality

Reading the news about layoffs everywhere, every day in the past few months I have been filled with gratitude about my job, because I had one.

Now that I don't, I'm equally grateful and proud of everything I've achieved at Aivamastu.

I got to handle tasks like scrapping data from websites using selenium, writing python scripts for data cleansing, making out insights from data, using openCV for facial emotion analysis, NLTK for sentiment analysis and also done extraction of text from video, image and documents. For more details i can share my CV with you, just drop down your email address in comments.

Now I'm ready for more exciting things in my professional life. So if you know someone who is hiring for a Data science or Analyst role, can you please tag them?

Please like and comment on this post for better reach. 🙏

Hello,  
My name is Vishal Mishra. I have 5 months experience as a junior software engineer. I am passout [B.Tech](#)(2021 batch). Due to recession company laid off as well as many of my teammates. I have good knowledge in Python, SQL, OOPs, JavaScript . I have trained in backend development.  
I check many but till now I did not get an opportunity.  
Please help me 🙏.  
Thanks and Regards,  
Vishal Mishra.

...

I've been laid off from [HealthifyMe](#)

Unexpected but it happened very soon, out of the blue. They chose to cut off 25% of their workforce out of which my role also got impacted.

Although I got to work with great folks there, I am urgently looking out for new exciting opportunities now.

Open for Senior Talent acquisition, recruiting, onboarding, payroll, training and induction roles.

Current location - Hyderabad.

Open to work in Hyderabad/Pune or remotely.

Available Immediately!  
[#laidoff](#)

Hello everyone,  
I joined [OYO](#) on August 8th as a fresher from IIT Kanpur as a software developer. I was determined to learn and experience a fast-paced working environment with great mentoring and learning from such amazing peers. Unfortunately, this experience was short-lived because I got laid off from [OYO](#) due to recent mass layoffs.

Currently, I am looking for an SDE role that would push me to learn new things and also contribute to the organization using my technical skills.

It's a request for everyone reading this to let me know of any such opening, help me out with referrals or relevant connections, or by sharing the post to spread the word. Any kind of support is highly appreciated!

Thanks in Advance!

[#laidoff](#)

Hi Everyone,  
I joined OYO as a fresher from IIT Roorkee as a software developer in August. It was a great experience to work in such a fast-paced environment and enhance my technical skills.  
Unfortunately last week, I got laid off along with many employees due to the recent downsizing at the firm for cost-cutting reasons.

I am looking for job opportunities in the software development role. Any leads will be helpful.

I have experience in frontend development using in-demand technologies like React and Backend development using Java and spring boot.

If you are a potential recruiter or have a suitable referral opportunity, you can dm me or reach out to me at [chiragbaghla88@gmail.com](mailto:chiragbaghla88@gmail.com).

[#laidoff](#)

Hello Everyone.  
I joined [OYO](#) as an intern from [Dhirubhai Ambani Institute of Information and Communication Technology](#) in January 2022 and became SDE-1 in July 2022. Working in a growing startup proved very exciting as getting the opportunity to take complete responsibility of a project helped me learn a lot.

But unfortunately, I got laid off by OYO due to recent downsizing at the firm. I am looking for roles in software engineering domains. If you are a potential recruiter or have any leads for hiring, please DM me or reach out to me at [arshitmangukiy@gmail.com](mailto:arshitmangukiy@gmail.com) .

On the last slide, there were several examples of individuals who had just been laid off and were looking for job right away. I kept coming across postings on LinkedIn from individuals who had lost their jobs as a result of the recession. Employees who are suspended or laid off both experience some level of dread as a result of the layoff. Both suspended or dismissed workers and those who escape downsizing or staff layoffs may suffer grave consequences. Employees who have been laid off may display astonishment, rage, suspicion, skepticism, frustration, and escape. If employee layoffs are not handled carefully and correctly, there may be demonstrations and conflicts.

# Industry-wise Layoff Percentage

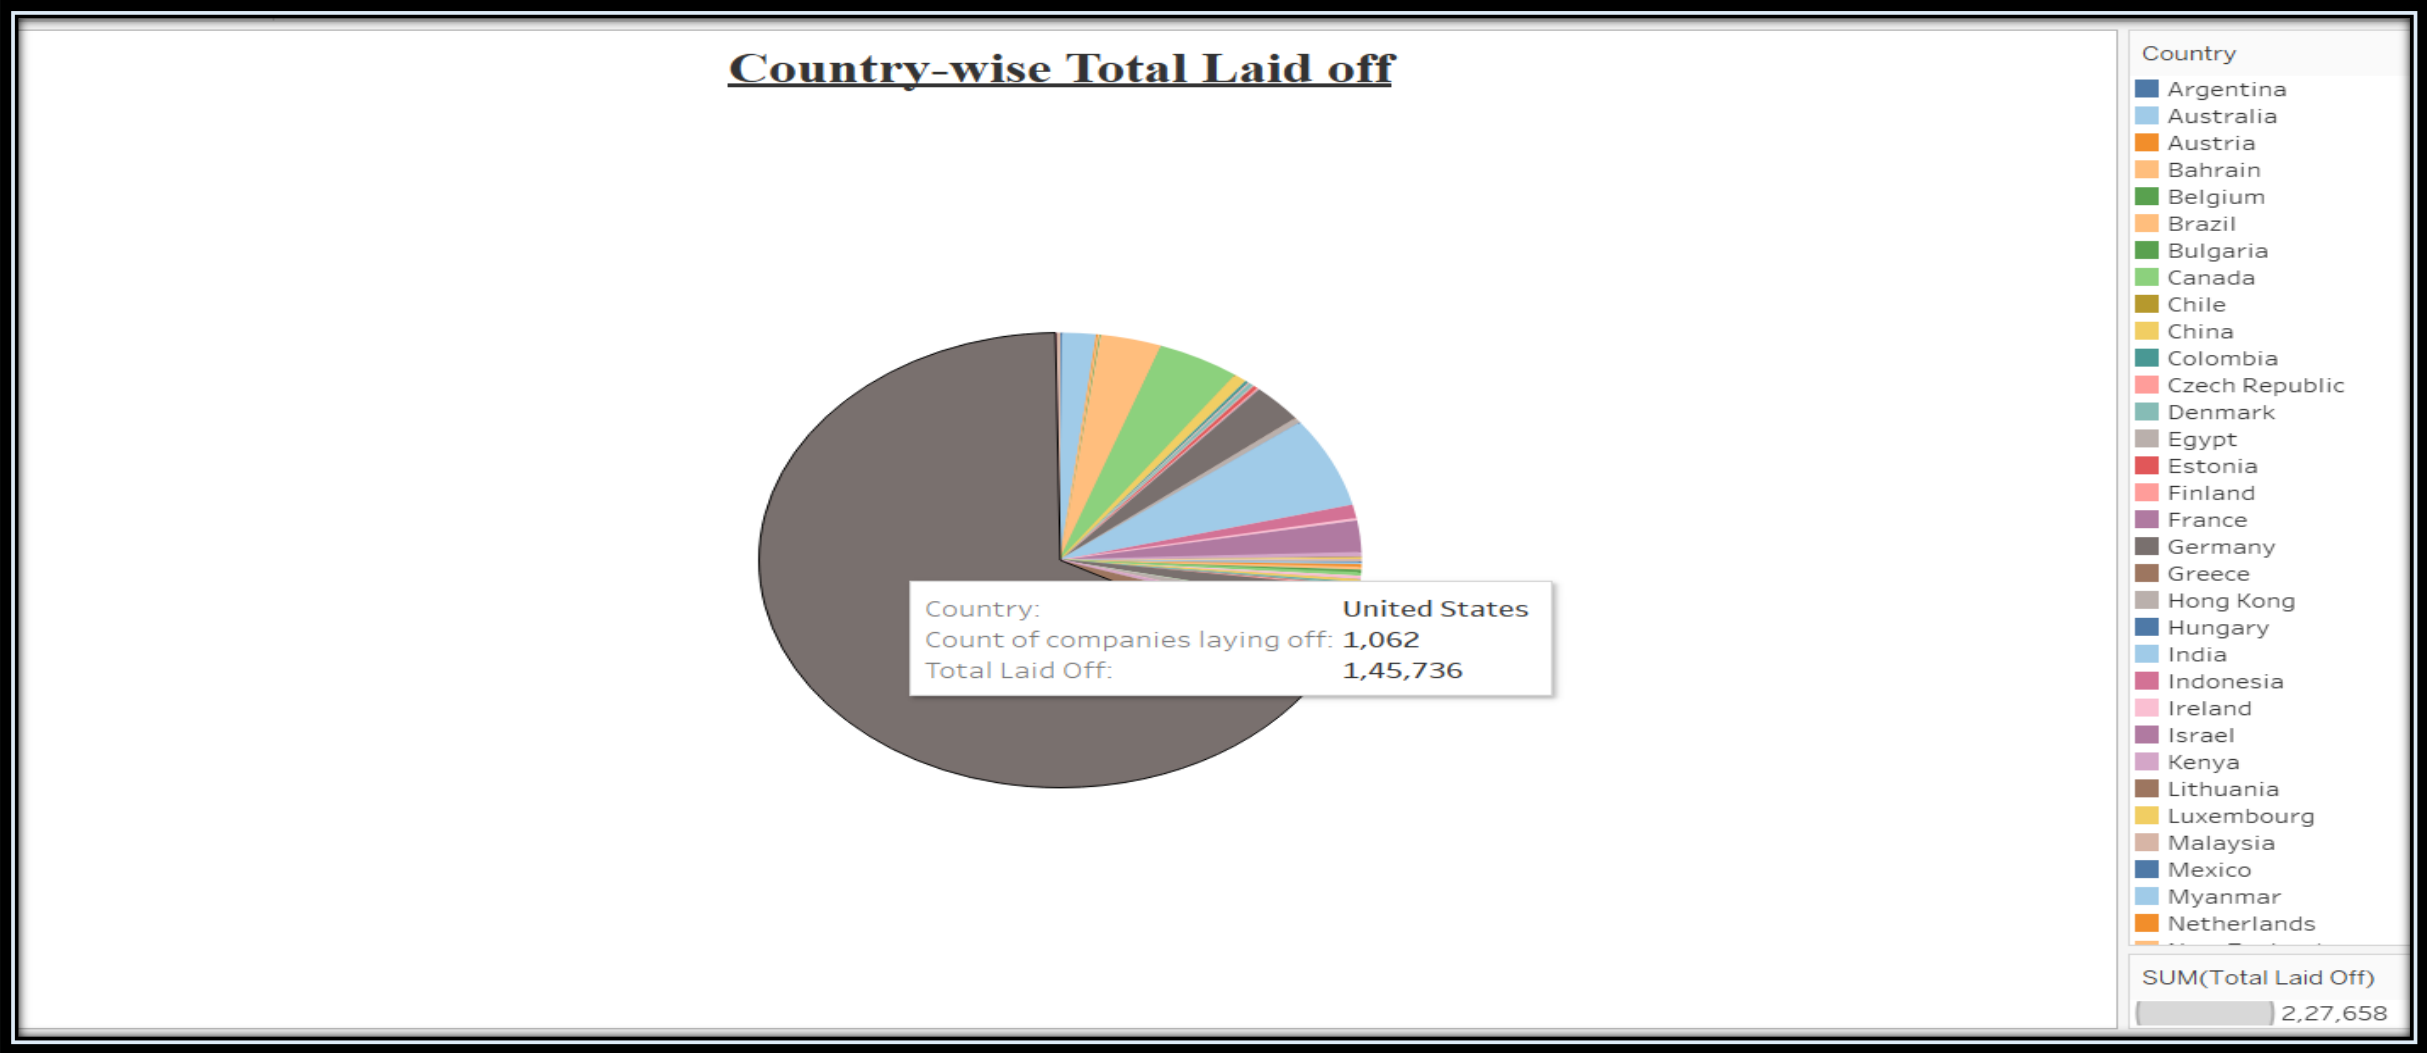

Layoff anxiety is real, and it can significantly impact your well-being. Studies have shown that job insecurity can negatively impact your concentration and motivation and lead to mental health issues, such as anxiety and depression. The following visualization on the screen shows the Industry wise trends in Layoffs.

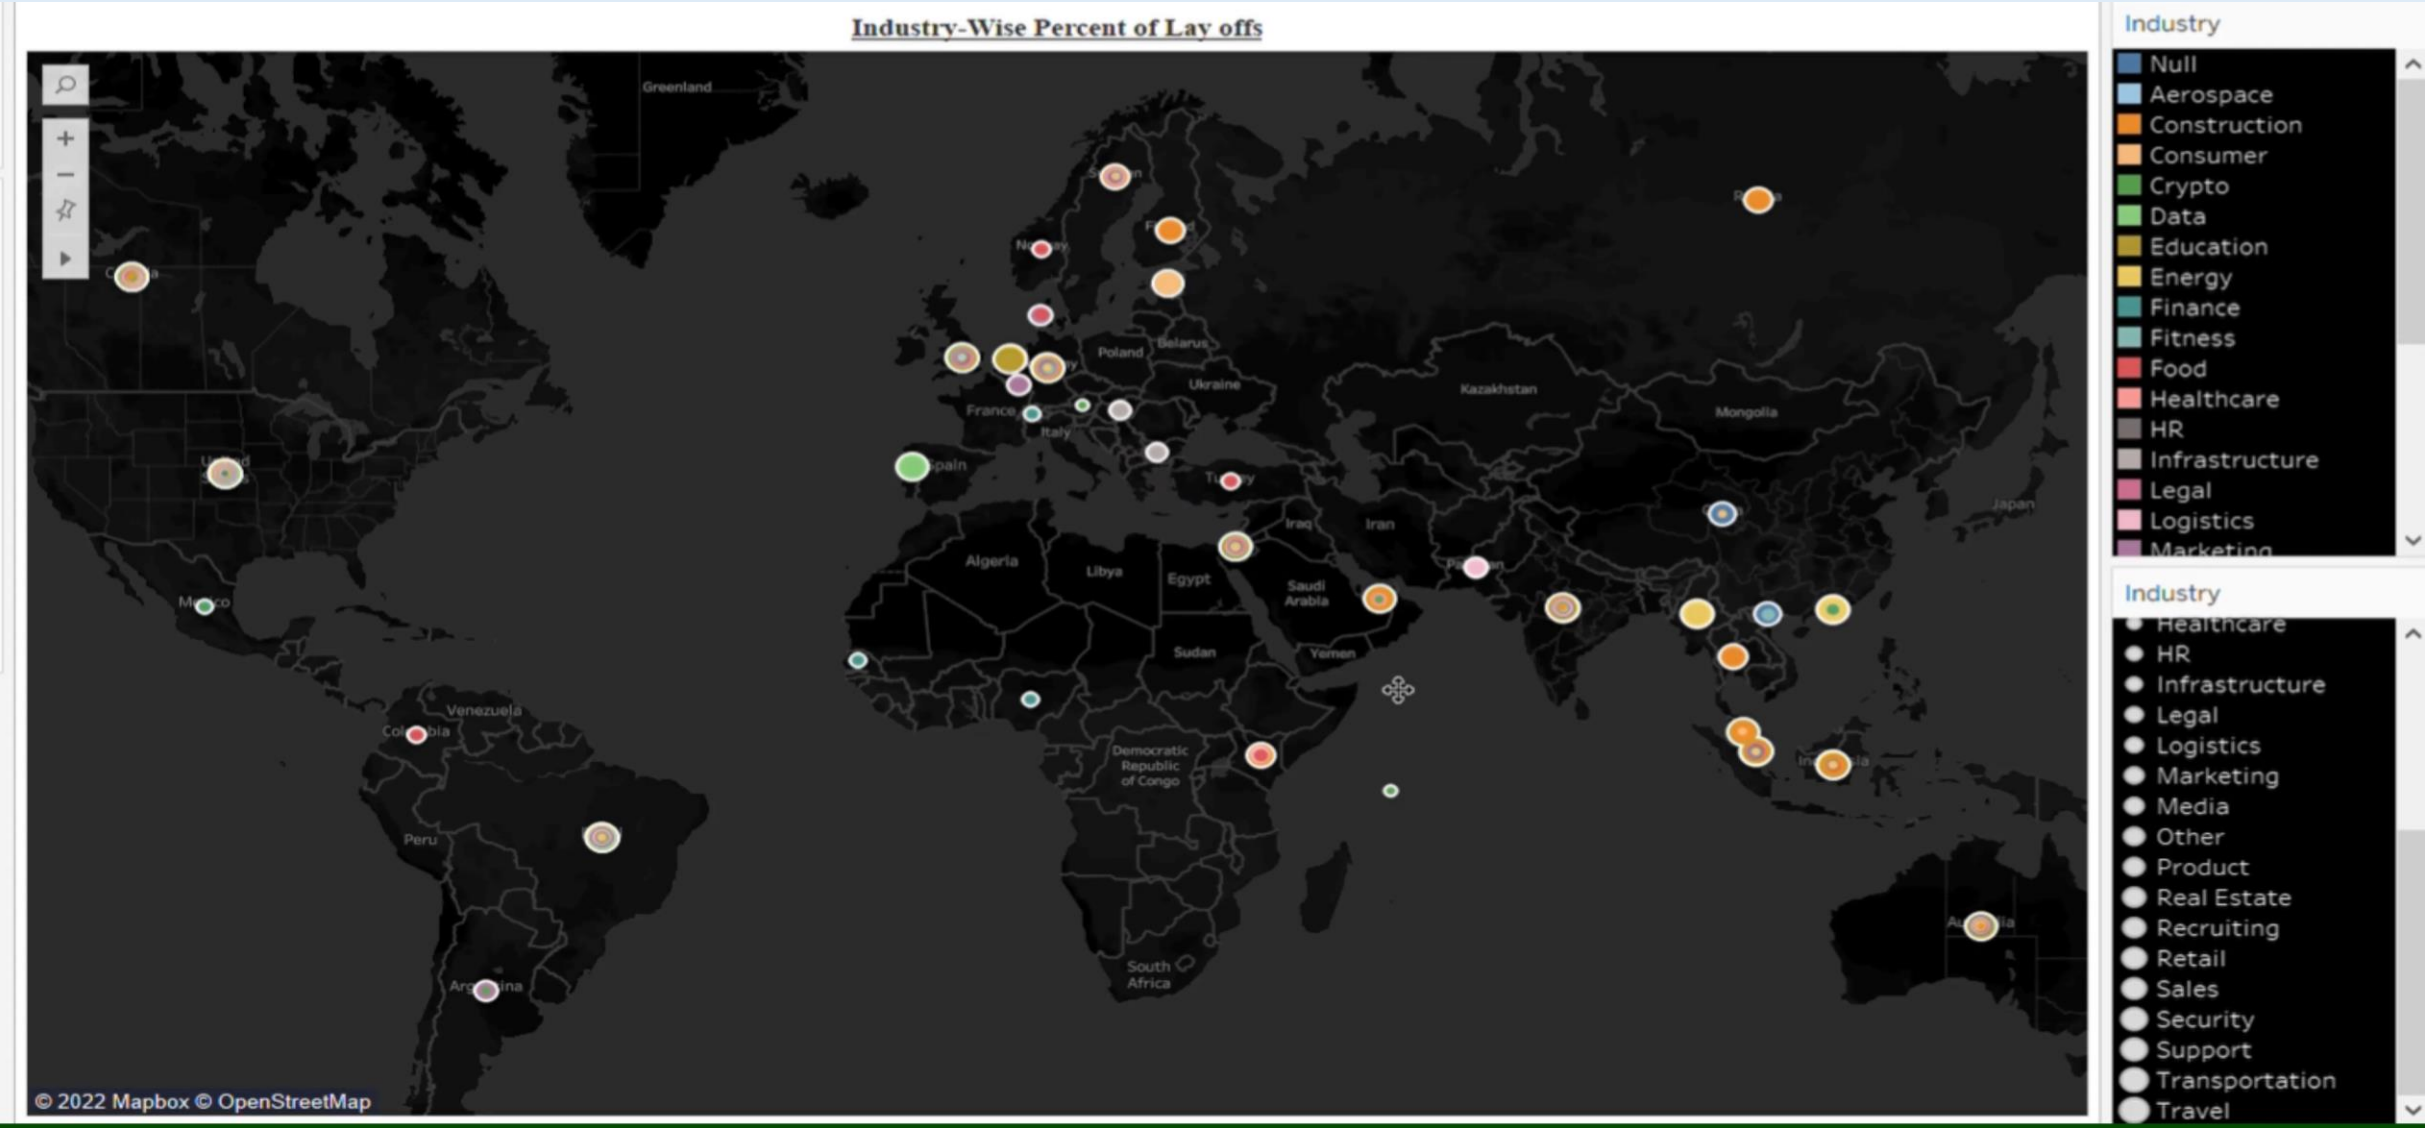

# Country-wise Total Laid off

The pie chart shows that US has the maximum number of Layoffs. Around 1062 companies have laid off 1,45,736 employees and it still hasn't stopped. Corporate America is drastically reducing its workforce as part of its restructuring efforts to prepare for a probable economic downturn brought on by the U.S. Federal Reserve's fight against inflation and the war in Ukraine

# Industry wise Layoff Percentage

The following map shows the percentage of layoff of each industry in each country

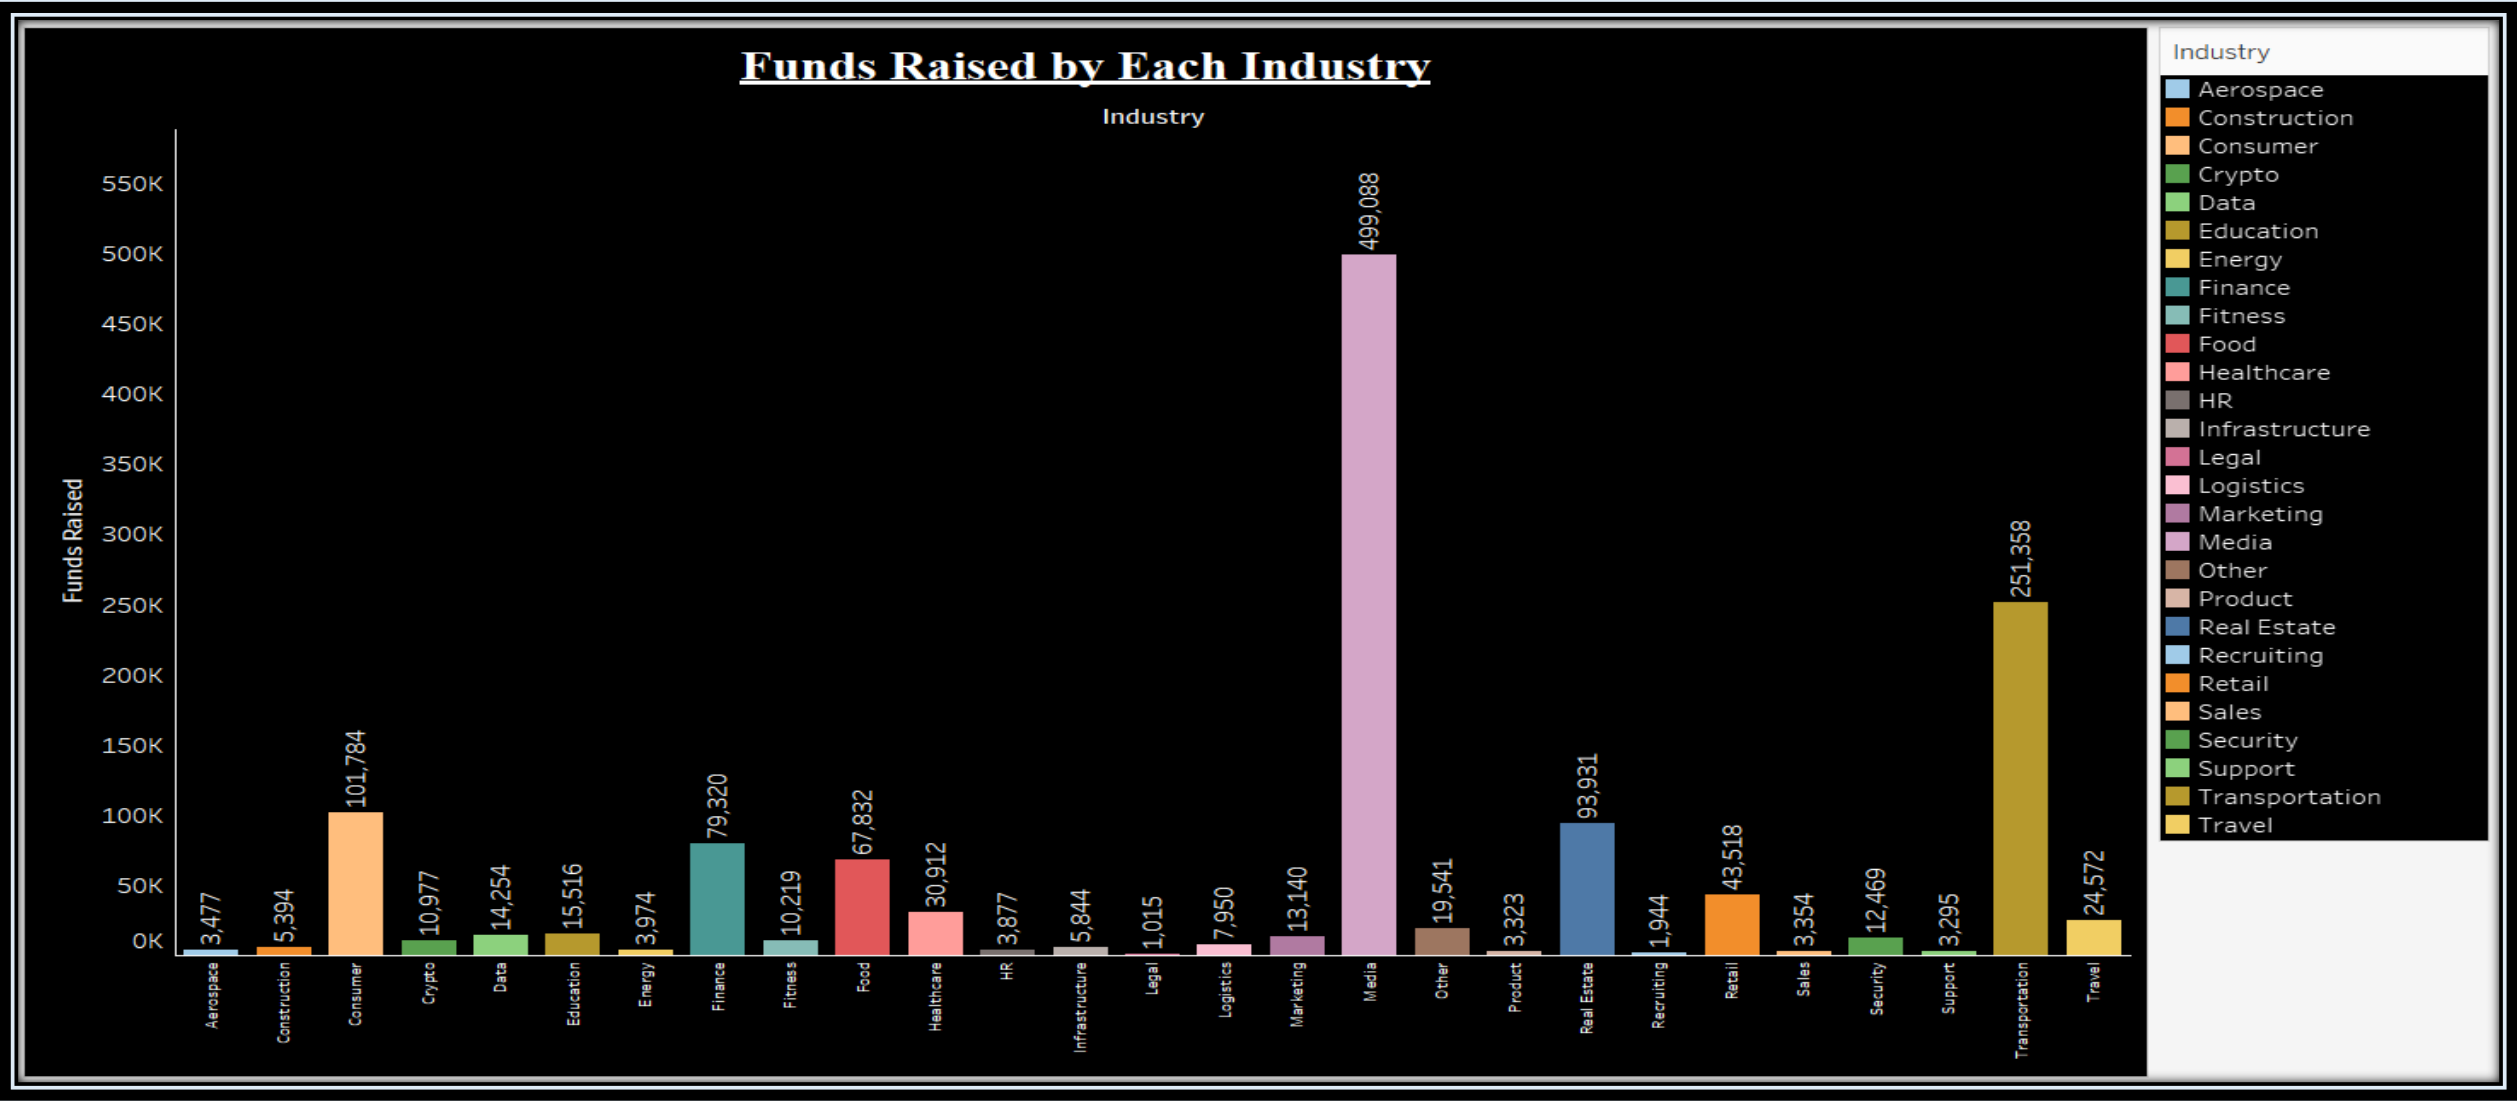

# Companies Country-wise

Location plays a huge role in attracting and retaining the best employees, many of whom keep a close eye on where they're based in order to optimize work-life balance. Good location decisions can significantly boost a company's long-term performance. Poor ones can cost millions in lost talent, productivity and capital.

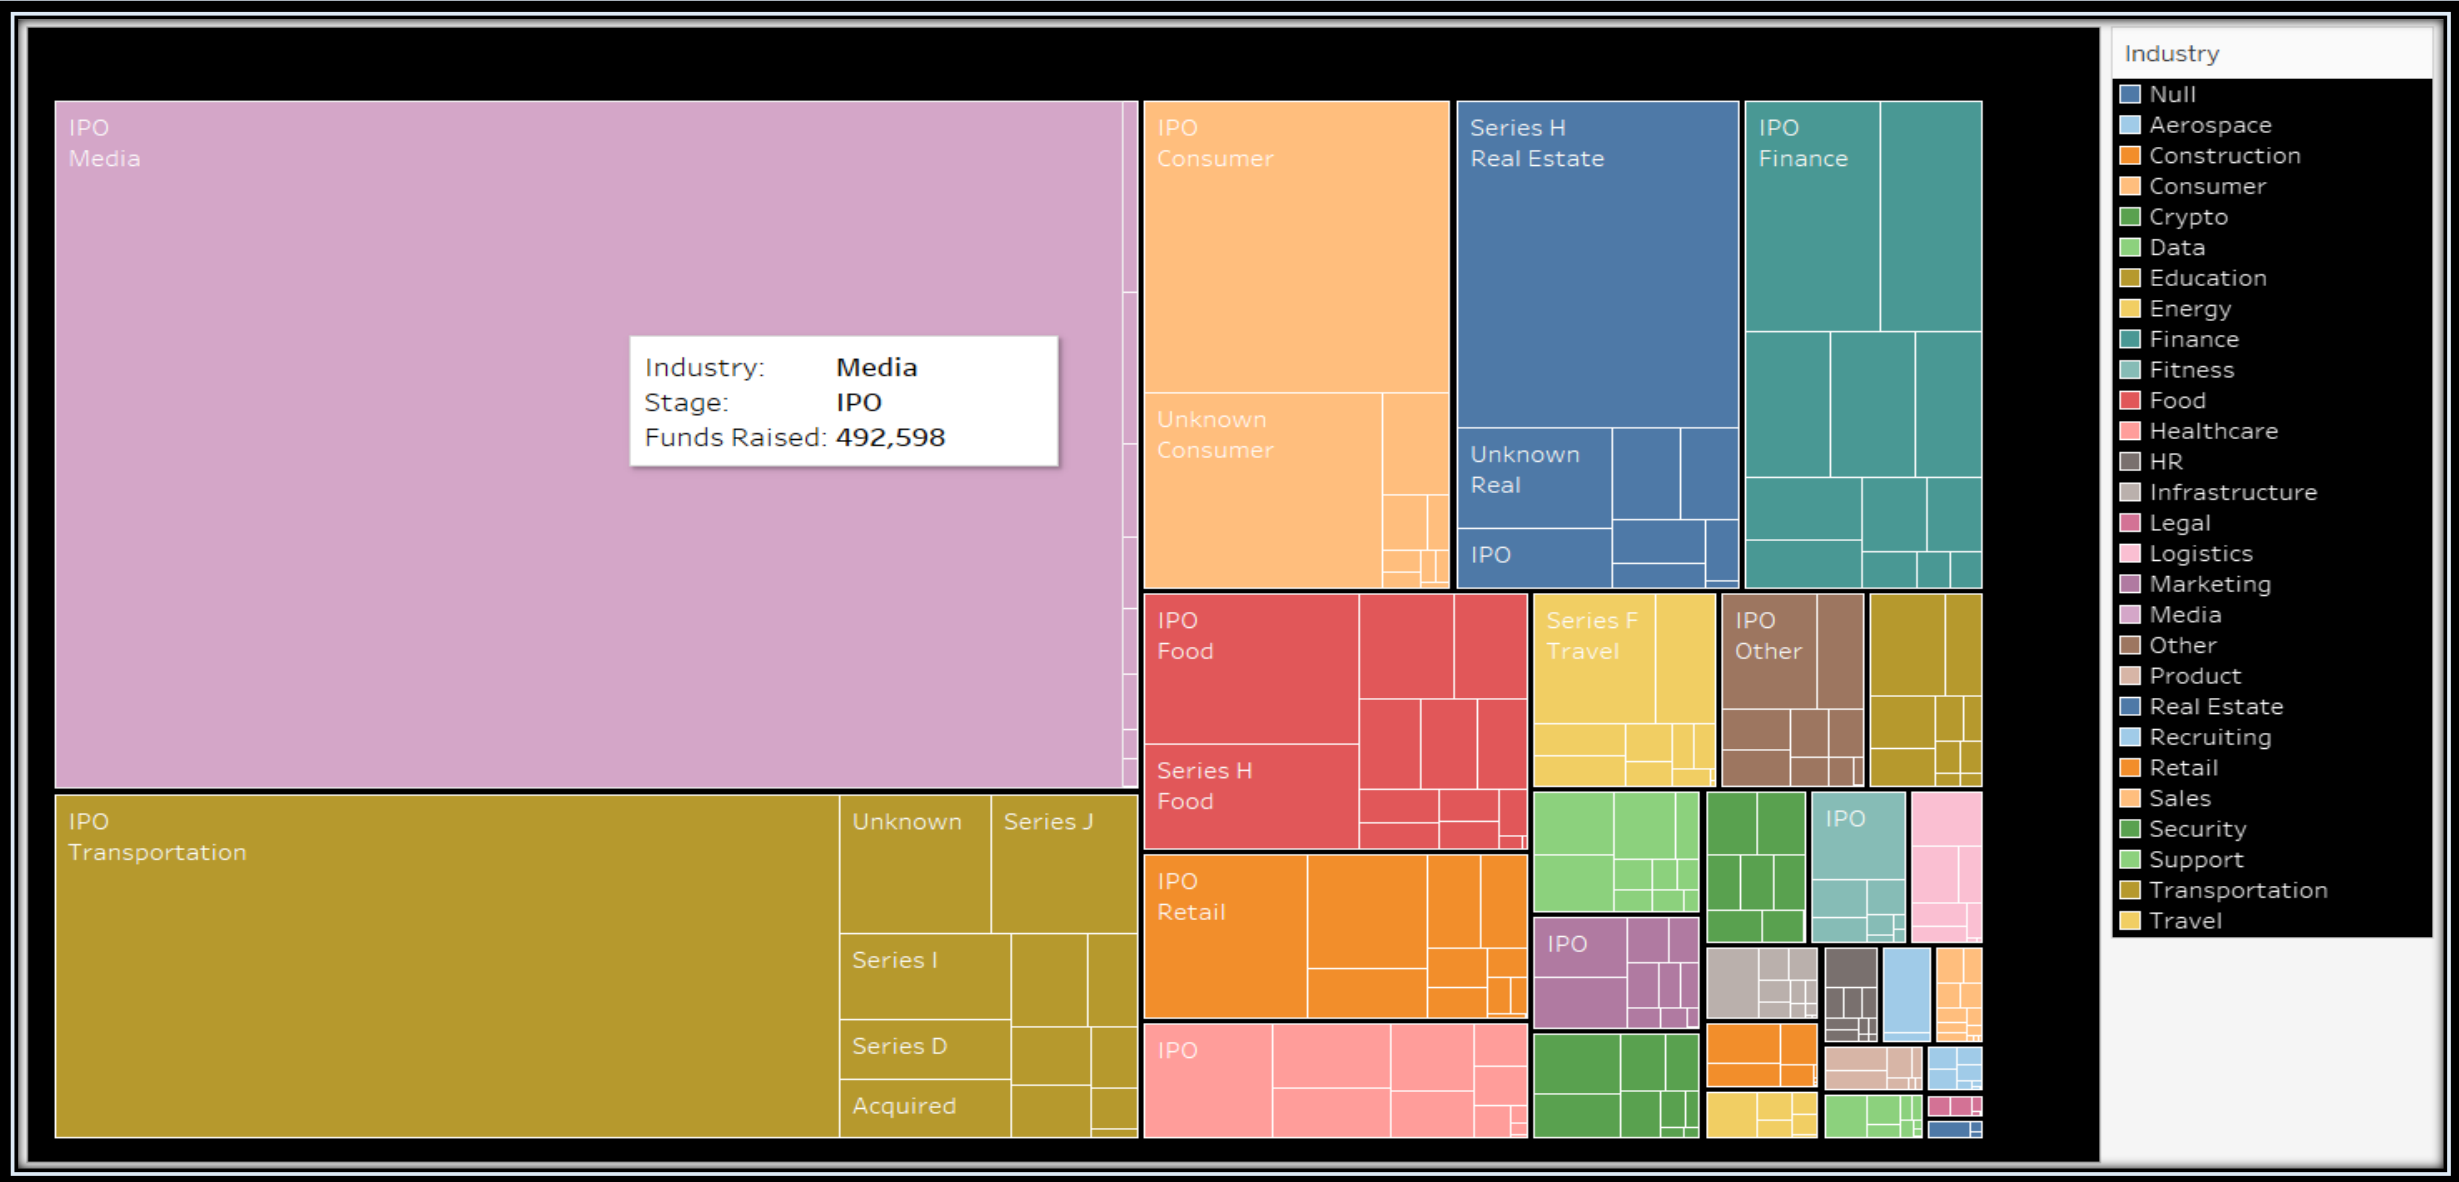

# Funds Raised by each Industry

The main sources of funding are retained earnings, debt capital, and equity capital. Companies use retained earnings from business operations to expand or distribute dividends to their shareholders. Businesses raise funds by borrowing debt privately from a bank or by going public (issuing debt securities). The following bar graph shows that the maximum amount of funds have been raised by the Media industry

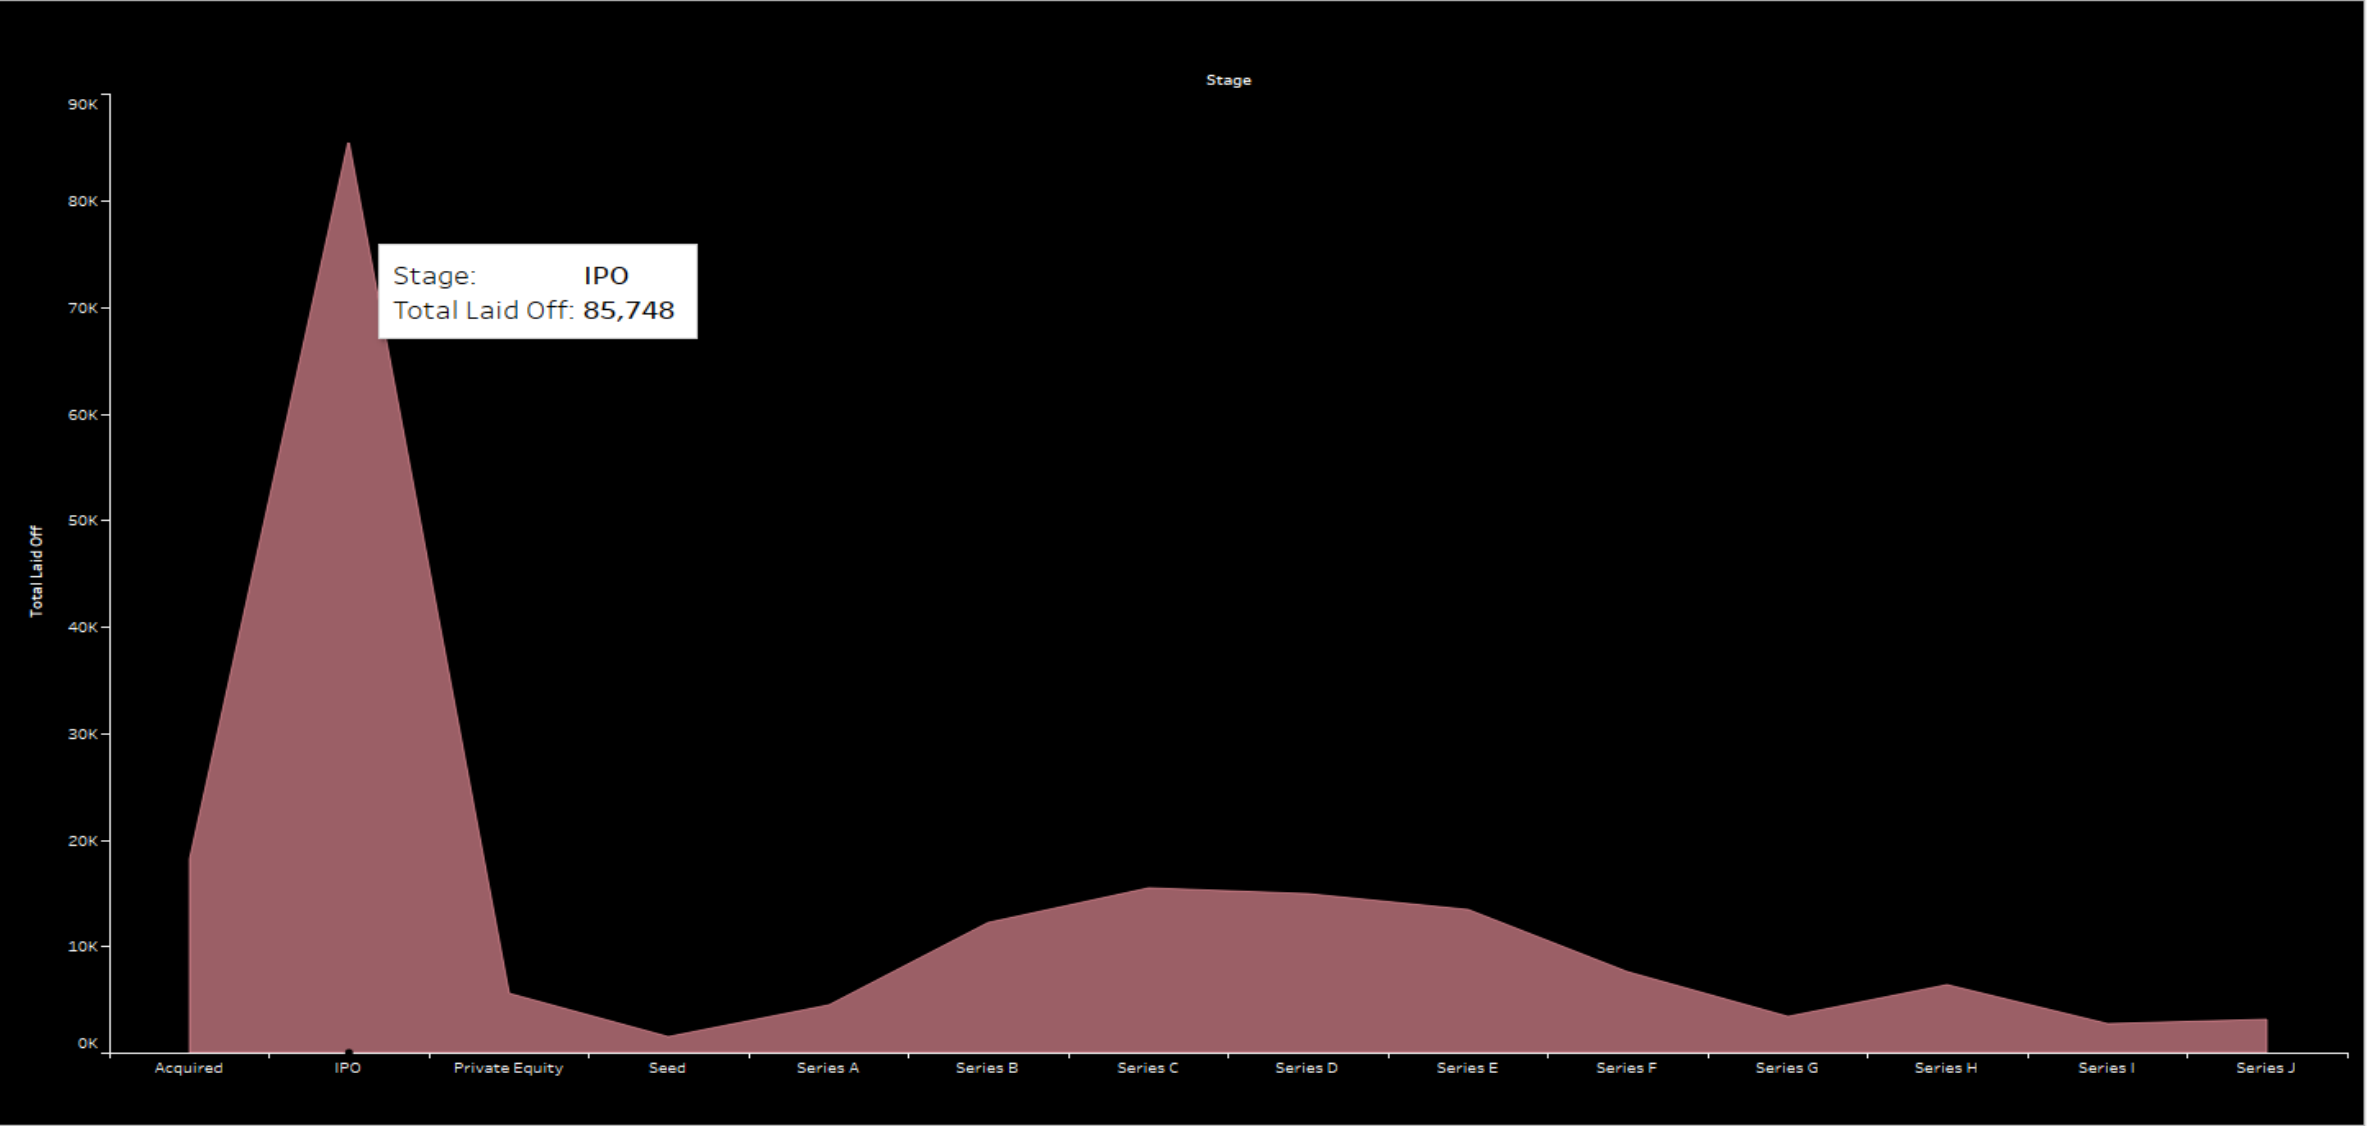

The following Tree Map shows the Industry, Stage and their respective funds raised.

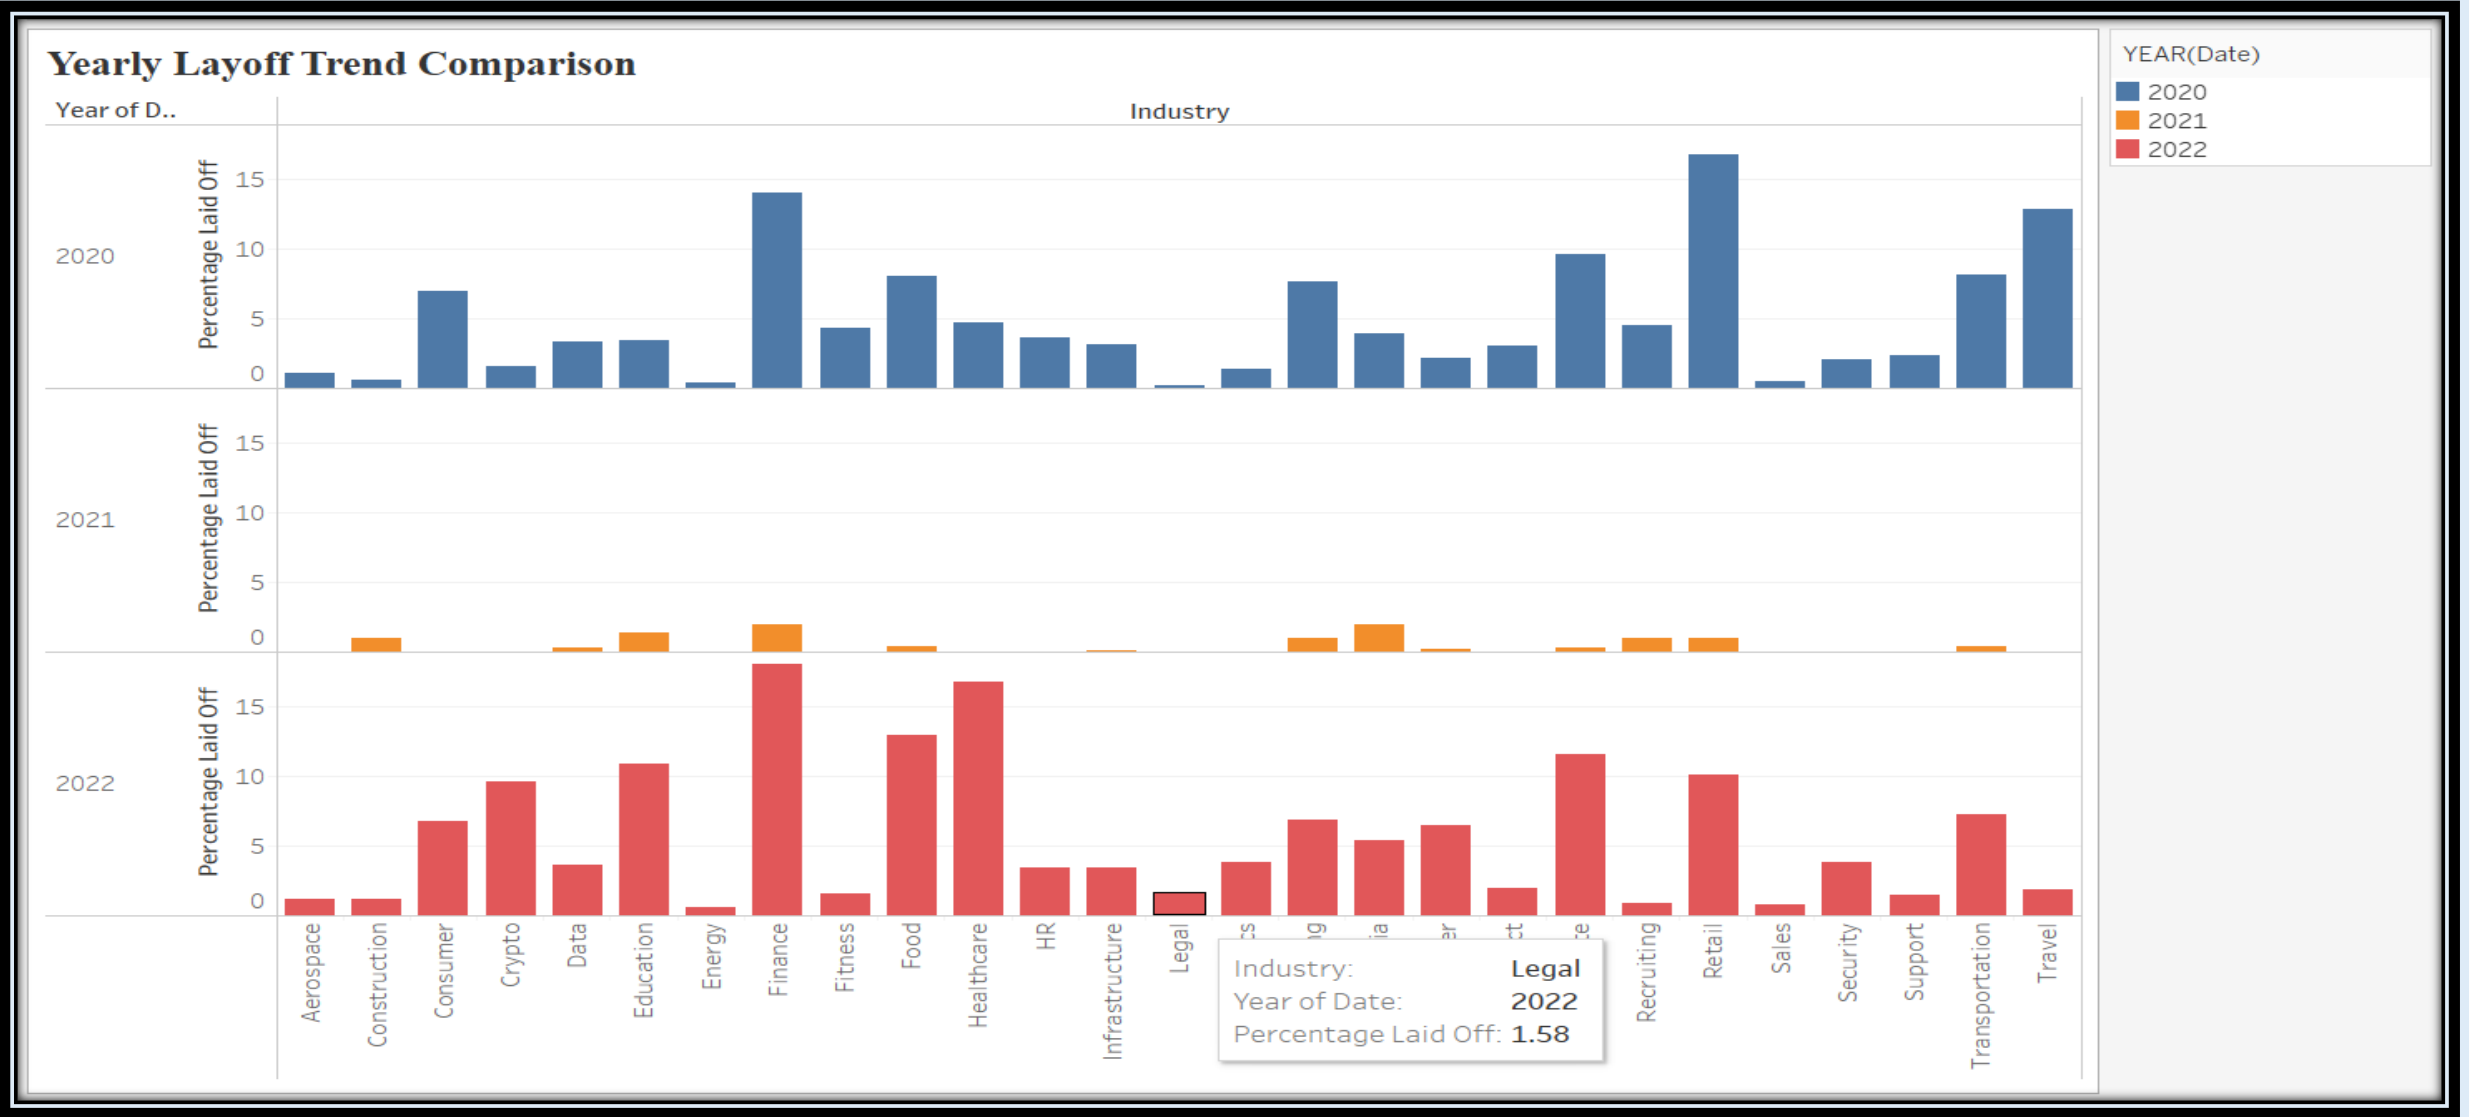

This bar graph shows the total number of people who had been laid off belonging to a particular stage

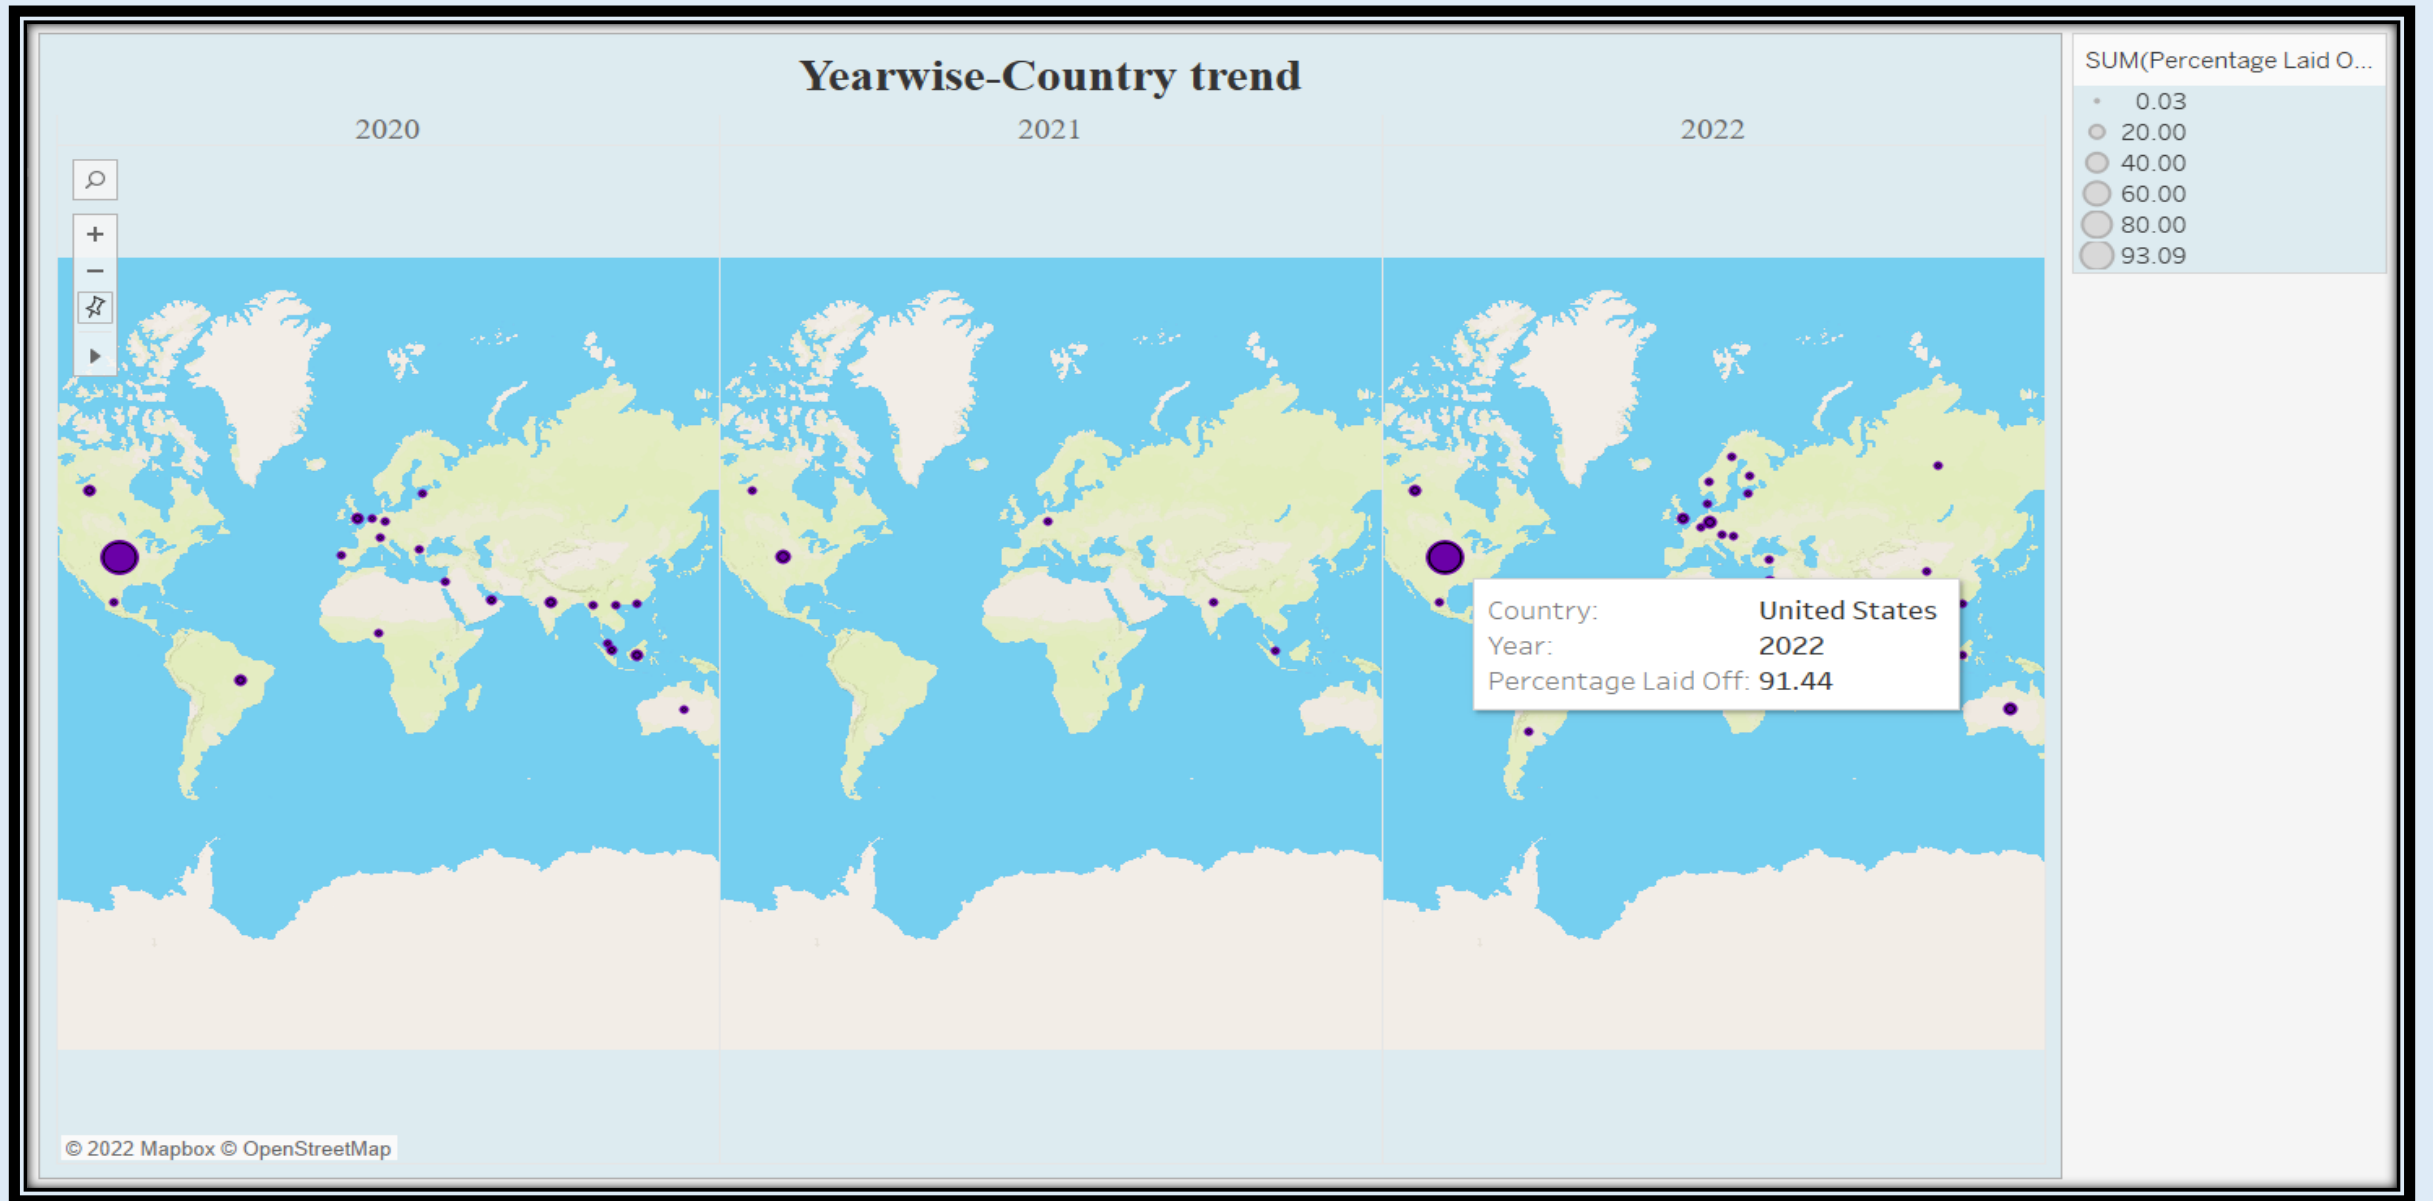

# Yearly Layoff Trend Comparison

The bar graph shows the year wise trends in lay offs in each industry. From the bar graph we can derive that 2022 has gone through the maximum number of layoffs irrespective of the industry

# Year wise Country Trend

This map is the year wise trend of Companies and their respective lay-off percentage over the course of 3 years from 2020 to 2022

The most common reasons why employees are laid off include cost-cutting, staff reduction, relocation, buyouts, and mergers. However, company owners can choose other options instead of terminating their employees' contracts. The person who is laid off suffers the most distress, but remaining employees suffer emotionally as well. Lets be nice to each other and make this world a better place to live and thrive.
